Clean Citrus Plants Indexed for CTV and Greening Disease

Citrus Nursery Centre

Institute of Horticulture Technology

Mandira-Kamrup, Assam

www.iht.edu.in

Clean Citrus plants need to be generated by following a standard protocol. In citrus, we face major problems such as CTV and greening disease. CTV can cause tree decline and stem-pitting, resulting in significant loss of yield and productivity.

For generation of Clean Citrus Plants Citrus Nursery Centre was established by Institute of Horticulture Technology in Mandira, Assam in 2016 Assam in 2016, to address the major concern of producing high-quality indexed planting material for Khasi Mandarin, sweet Orange, Assam Lemon and other Citrus cultivars.

At citrus nursery centre, we work to supply indexed virus and disease free quality plants to our customers through the best innovative combinations of nursery practices and modern advances in agriculture.

Our experts follow S.O.P's recommended right from the selection of the seed from the mother plants for root stock development to the raising containerized nursery in soilless medium to ward off soil borne disease.

Benefits:

- Policy makers looking for clean citrus plants can advise the stakeholder to avail the opportunity of buying quality planting materials from the Citrus Nursery Centre. With virus and disease free clean citrus planting material along with proper site selection, systematic planting, proper manuring schedule, improved orchard management practices, adoption of suitable soil and water conservation measures, plant protection measures etc. the quality productivity of citrus will improve.
- As every root stock and mother plant is indexed against CTV and Greening disease and maintained in insect proof containment facility before and after grafting to prevent vector borne diseases, the farmers will get CTV and Greening disease free quality planting material which in turn will result in more profits from Citrus Cultivation and benefit society at large.

Clean Citrus Plants free from CTV and Greening disease of various age groups are available for sale. You need to book the plants in advance for assured delivery.

Screenhouse to protect citrus at Mandira, Assam; Citrus Rootstock grown in nethouse to protect from pests and disease; Citrus Rootstock in containers – ready to sell

*Genomics lab for disease testing
Bio indexing for citrus using ELISA for CTV*
